That's among positive results of how mcdougal could influence your readers out of each theory. And this ebook is had to read , sometimes detail by detail, so it might be great for both you and your own entire life. The assumption here is that matters not subject to cut-and-dried "hard" proof don't bear any relation to evidence, experience, or reason at all and are, therefore, completely arbitrary. There is considerable indirect evidence one can bring against this view. For one thing, the people who advance it don't stick to it in their own lives; they make decisions based on indirect evidence all the time and strongly resist any imputation that such decisions are arbitrary. For another, if it were possible to do criticism according to hard-and-fast, totally objective rules, the editor could hire anyone to do it and pay a lot less than he has to do now for people with special ability and training (low though that pay necessarily is). It's true that the apparatus by which critics judge books is subjective in the sense of being inside the critic and not outside, unique, and based on the intangibles of training, talent, and experience. But that doesn't per se make it arbitrary. What can make it seem arbitrary is that the whole preliminary process of judgment, if you trace it through all its stages, is coextensive with the critic's entire education. So critics tend to suppress it in reviews (with time and training most of it becomes automatic, anyway). Besides, much critical thinking consists in gestalt thinking, or the recognition of patterns, which does occur instantaneously in the critic's head, although without memory, experience, and the constant checking of novel objects against templates-in-the-head (which are constantly being revised in the light of new experience), it could not occur at all.* Hence angry readers can make the objection above, or add:.76."Take whom you like," said the grey man, "so long as you bring back my mirror." A reasonable assumption, since he had struck out his first time to bat, with a shameful 43. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. Barry couldn't get a toehold anywhere on the smooth facade of the man's compulsive natter. He got the feeling,."Very well," said Amos a third time.
