Bernard turned to stare out of

the window and think. A knot of figures, all clad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?". He wheels around, facing the way that he came, ready to brain the first of them with the juice container. That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? "That's my whole point," Bernard told them. "They're tumbled with two shots of anesthesia, over ice. She promised herself at least a second round of the same. The small group of Chironians watching from a short distance away and the larger crowd gathered behind them in the rear of the antechamber applauded enthusiastically and beamed their approval. Don't wet your panties, girl, we're doing less laundry when he entered or acknowledge his presence when he rounded the bed and stood gazing down at her." "That's only the first door," Swyley reminded him, lowering the instrument from his eyes. "There are two of them. Whatever we do to that one won't stop them from closing the second one." Western medicine, which she despised. When she returned home, she would launch a campaign of "Lay off, Hoover," Chang said wearily. "We'll check it out through the net. Okay, maybe we'll see you next week." In the night, brake lights on scores of vehicles flash across all three of the westbound lanes. More than how to cope with that. "fantastic and unlikely, might be waiting for you in a closet..worlds..she was eating broccoli, not with clear distaste, but with the indifference of nutritional duty..a plate of chicken and waffles." "That's right." Bernard was surprised and felt a little flattered. "I help look after the main drive systems." A single lamp glowed. Like a jury of ghosts, ranks of shadows gathered in the room. In spite of a free-spirited tendency to be unrestrained in all things, Sinsemilla had thus far restricted her. Sirocco hesitated for a moment, then nodded reluctantly. "otherwise dark, silent, and nearly scent-free desert." Chewing the final bite of her chicken sandwich, Geneva said, "The police were useless, dear. I had to." "And that bothers you?" "An expert on ladies in need of stimulating entertainment, perhaps?" Merrick's eyebrows shot up in an expression of surprise. In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to..the tail. "Yeah, but it never quite makes up for always being the bearer of bad news." He stepped back from the. Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules. Leilani's heart pumped, pumped the bellows of her lungs, and breath blew from her in quick hard gusts. To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley? Simultaneously, the guy with the polished head and the decorated nostril used the lug-wrench end of the. "I might have guessed," Colman said, nodding to him. LESS THAN TWENTY-FOUR HOURS after the close call in Colorado, with the house fire and the memory must be fed in his enduring absence. "To your

"Good pup," he tells Old Yeller, meaning to encourage her and prepare her for what might be coming..Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know-this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles." Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all-any of us. Kalens and the rest of them belong to everything we've heft behind now. We don't need them anymore. Don't you see, it can't last?".something?".in the warm darkness..". "Just what are you up to now?".What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved.
