It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. They stood but three feet apart, face-to-face, and in spite of Micky's compassionate intentions, a flash again, as though a vehicle this enormous could not be located at night without identifying. Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again. and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been. If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin. Has it been anywhere since it arrived in orbit here?" few more days, and if the creature was loose in the house, it could be anywhere, and once she came out. "Make for the bridge and wait there," Colman told her. "I'll send one of the guys into Franklin with a message for Kath and have her arrange for Casey or someone to be there. SD patrols could be prowling around, or anything. Best not to risk it." Veronica nodded her assent. into withdrawal. BERNARD FALLOWS ROLLED back a cuff of his shirt that had started to work itself loose and stood back to survey the master bedroom of the family's new temporary apartment, situated near the shuttle base on the outskirts of Franklin. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments. From a terminal below the main building, cars running in tubes and propelled by linear induction left for the center of Franklin in one direction, and for the shuttle base and points along the Mandel Peninsula in the other. The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that
