The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily.. "Well, I think there's something to be scared about," Paula said. "Suppose they turn out to be really mean and don't want to mess around with talking at all. Suppose they send a missile up at us without any warning or anything .. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower li, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower li around and embark her on another twenty-year voyage, back to Earth..Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Stern. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterns to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Stern's mouth clamped into a grim, down turned line.."I don't how." Amy screwed her face up and rubbed the bridge of her nose with a finger. "We're convinced 'this is the only way to go. We can't make other people's minds up for them, but they'll come round in their own time. Anything else would cause worse problems.".Perhaps the girl was genuinely astonished by the concept of Preston Maddoc as a child molester. Or.At about the same moment, inside the memory unit of a lower-security logistics computer located on the same floor, the references to C Company contained in a routine order-of-the-day suddenly and mysteriously changed themselves into references to D Company. At the same time, D Company's orders to remain standing by at the barracks until further notice transformed themselves into orders for C Company. Ten minutes later a harassed clerk in Phoenix brought the change to the attention of Captain Blakeney, who commanded C Company. Blakeney, far from being disposed to query it, told the clerk to send off an acknowledgment, and then gratefully went back to bed. Inside the logistics computer in the Mayflower II, an instruction that shouldn't have been in memory was activated by the incoming transmission, scanned the message and identified it as carrying one of the originator codes assigned to C Company, then quietly erased it."It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable.
