Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower l/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..Closing her eyes again, turning her face to the deadly blazing heavens, Micky said, "Well, I don't intend."Was it ever like this? They were talking loudly and seemed to be a little the worse for drink. Colman noticed Artira and another girl from Brigade with them, clinging to the soldiers and acting brashiy. He shook his head despairingly, but it wasn't really his business. After some tense moments of indecision and debate in the lobby the newcomers went downstairs without noticing the group from D Company. Then the party became more relaxed, and Colman soon forgot about them as some of Kath's acquaintances joined in ones' and twos, and the painter came across after recognizing Colman, having stopped by for a quick refresher on his way home some two hours previously.."There won't be a war on Chiron, will there?" "But we only know what we know, and we can only do what we can do. Surely doing so is not going to make things any worse. Will you try it?" Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. "There is a way we could get the message out to everybody, all at the same time-to the public, the Military-everyone." He looked around again. The others waited. "Through the Communications Center up in the ship," he said. "Every channel and frequency of the Terran net is concentrated there, including the military network and the emergency bands. We could broadcast from there on all of them simultaneously. You couldn't make much more impact than that." He sat back and looked around again to invite reactions..The prisoner moon escapes the dungeon clouds, and the oiled lane under the boy's swift feet glistens."I meant as a regular job," Driscoll said. But not modern ones..".Leilani listened intently. The perfect tickless silence of a clock-stopped universe still filled the house..and I just thought I'd see if you were all right."A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way..Chapter 19.gong of sheer fantasy.."I'm sure Adam would be more than happy," Kath interjected. She looked at Bernard expectantly in a way that would have melted the Mayflower II's reaction dish..When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia.. "First of all, there's nobody who'd notice or think to ask. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation-to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing..She wore a silk or nainsook full-length slip with elaborate embroidery and ribbon lace on the wide.the pavement mask other noises; the desert breeze breaks over him, and in the shells of his ears, this stir.Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does..".Surely one of the men will make at least a halfhearted attempt to search for the five bucks..cup, Micky didn't mind the edge that the brew acquired. In fact, Leilani's story stirred in Micky a long.The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a

name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree.. "The ship's changed a lot since then though," Colman remarked. "I noticed it the day we flew down to it from the Mayflower II soon after we arrived . . . when Shirley and Ci met Tony Driscoll. The front end must be at least twice as big as it used to be." Bernard wasn't getting through, he could see. "Take Kath as an example," he said, turning toward Nanook. "A lot of people around here seem to accept her as... boss..different reasons. Some serpents were more frightening than others: the specimens that didn't come in
