"Sure, if this was for real, I'd put money on it." "Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about

twenty minutes." CHAPTER FOUR. Jarvis appeared Suddenly in the doorway beside Chaux. "Three companies in battle order have arrived at the Spindle and are heading forward, and more are on their way from the Ring," he announced. "Also there is a detachment from the Battle Module coming up one of the aft feeder ramps. They must be coming back to close the lock." The "market," as Jay had described it, was situated several levels above the terminal. To get to it they used a series of escalators. A lot of people were milling about, "You mean you'll be gone in a week?" Aunt Gen asked. A web of worry strung spokes and spirals at the. "That depends, ma'am. They can lead to a heap of trouble." Instead of a bath, she took a shower. "Lock at condition orange and ready to close." "But all the troubles in the world," said Wendy, "have the same one answer." .dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured.. Good pup.. Laura was safe.. "I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." To the astonishment of even themselves, they found that they could. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriena.. "I said you were in too much of a hurry," Jean said to Bernard. "Just think, all that work for nothing. We should have waited a bit longer for those Chironians to get round to us." .convey that he was as confused about what Wellesley was doing as they were. Wellesley looked slowly around the hall one last time. "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side.. of the bite, excited by the prospect of the entertainment to come.. Another pulse.. The discussion continued for a while longer without making any further headway, but Kalens seemed more thoughtful and less insistent. Eventually the others left, and Fulmire sat for a long time staring with a troubled expression at his desk. At last he activated the terminal by his chair, which he had switched off earlier in response to Kalens's request for "one or two informal opinions that I would rather not be committed to record." .swarm the night.. that have real issues to resolve.. .been reduced to a cloud of radioactive dust.. Bernard, Pernak, and Jean stared at the picture for a long time. Pernak's eyes were very serious, and Jean began biting her lip apprehensively. At last Bernard nodded and looked at the other two. "Okay, I'm with you," he told them. "Most of the people making all the big speeches out there aren't equipped to handle this. I don't think Iberia matters too much one way or the other anymore, but we need to get Lechat in on it-and fast." "Programs based on Jesus don't get enough public funds to make them worth faking the piety." He slid. standing on it.. They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. A screen at one end of the table provided an illustrated menu and a recitation of the chefs recommendations for the day, and Juanita dictated their orders to it. At the next booth, a wheeled robot that had been delivering dishes from the heated compartment that formed its uppermost section closed its serving door and rolled away.. Shaggy.. dreamed it, she twisted around in time to see the "treasure out of Eden" as it raveled in a long arc to the. "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who

won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Stern makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." Later that evening Bernard returned home from the shuttle base to find Jerry Pernak there. Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate. With haste, he passes among them. already be dead. thoroughbred but performed like a worn-out plow horse. "How many other engineers do you have here?" she inquired lightly, looking around the rest of the squad. It was clearly intended more to invite them into the conversation than as a serious question. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. "After what we saw today, I wouldn't be surprised if either side ends up going for him.." Jean shook her head in protest. "But you can't . . I won't go. I want to move to Iberia.." "There won't be a war on Chiron, will there?" Marie asked.. CHAPTER FOURTEEN
