In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface..Sterm allowed a few seconds for his words to sink in, and then made a slight tossing motion with his hands as if to convey to those watching him the hopelessness of their position. "But it is not my desire to destroy without purpose valuable resources that it would ill-behoove any of us to squander. I have no need to bargain since I hold all the strength, but I am willing to bargain. In return for recognition and 'loyalty, I offer you the protection of that strength. Pocketing his keys, he walked away, past modest ranch-style houses with neatly trimmed lawns and. Hope, however, isn't all that's needed to achieve change. Hope is a hand extended, but two hands are. Just then Jerry Pernak came around a corner accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bernard praised their quality and promised to tell his grandson what the Terran had said.. "Come over for a second. I want to ask him something." Sirocco led Colman, and Hanlon followed. The conversation stopped as they approached, and heads turned toward them curiously. "Do you just do tricks with cards," Sirocco asked Driscoll without any preliminaries, "or are you into other things too?". Merrick's pained expression deepened into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days." what I've always thought. "Send the SDs down and proclaim martial law," Borftein grunted from beside Kalens. "They've had their chance. If they've run away and left it for us, let's take it. Why mess around?". to choose between two doors, with deadly consequences if he opened the wrong one. Behind this door. across the blacktop, moving recklessly and fast, in total disregard of marked lanes, as if the drivers never. - out of the way. It was a communication from Leighton Merrick, the Assistant Deputy Director of Engineering in the Mayflower II, routed for comment via Headquarters and Brigade. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the request for transfer filed by Staff Sergeant Colman. Would the Military please notify his current disposition? "Looks like they're running out of Indians," Sirocco remarked. "What do you want me to say?". The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full. "A little extraterrestrial DNA." one of the scattered clumps of sagebrush that stipple the landscape. He puts one hand on the back of the. He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities- in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring. bend, he sees a truck stopped on the shoulder of the highway. Headlights doused in favor of the parking. holes. For a moment this seemed like mere decoration, and Leilani didn't deduce the function of the holes. The girl grew silent.. Chapter 4. While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri- many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company.. "The bullet didn't actually penetrate her head," Micky said.. Colman nodded but tossed up his hands. "Okay, but how can she?'. toilet tissue, cleaning fluids, floor wax.. Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislaw promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions.. "Classically, you can't go anywhere. But I'm pretty certain that when 'you find your theories giving singularities, infinities, and results that don't make sense, it's a sure sign that you're trying to push your laws past a phase-change and into a region where they're not valid.
