Sterm inquired curiously, although Celia couldn't avoid a feeling that he already knew the answer. She shook her head. "Where are you supposed to be?".Otto shook his head. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Sterm. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterms to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Sterm's mouth clamped into a grim, down turned line..SD's," Swley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension..Lechat shook his head. "It wasn't necessary. In a few more days Ramisson would have been elected, almost certainly. Then everything would have worked itself out smoothly and tidily. This action complicates everything again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months..".Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby..Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? Unidentified flying object cults?Fiction..Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said..Now she knew why Earth seemed so far away. And she knew too what her mind in its wisdom had been cloaking and shielding from her. It was fear..He set the coffees down and slid into the seat opposite 1ay. "Ever been thirsty?" he asked as he stirred sugar into his cup..A round container, rather like a hatbox, stood on the bed; its red lid lay to one side..With a cause, a crusade, a challenge, and a purpose-an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars..".Frankly," Leilani said, "neither do I. "It do it," he said simply. He averted his eyes for a moment longer, and then looked across at Celia. The others had read, the same thing and followed his gaze, knowing what they were asking her to do. Colman could see the torment in her eyes as she looked back at Lechat. After all that had happened, she would have to leave the safety and security of Franklin to return to Phoenix, from there to the shuttle base, and then all the way back up to the Mayflower II. There was no other way..By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already..Sinsemilla said, "Oh, Lani, baby, you should see yourself! You look so completely St. Patrick, in a total."The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else,

eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design.. "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek "He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested.. "I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab..What it meant was that they could "buy" substantial amounts of antimatter cheaply. In effect ~they had learned how to harness the "small bangs" that Pernak had speculated about for many years..A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way..required to be pulled out of a deep hole. The second hand was faith?the faith that her hope would be.Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Rameley grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room.. "Was that why those guys took off?" Jay asked, by now having regained most of his color. "It probably had something to do with it," Colman said, grinning. "That's the kind of trash you have to deal with. Still interested?".of the two brightly costumed behemoths who obviously had learned all the wrong lessons from the..Not long after Colman and Kath had sat down, Swyley's radar detected Sergeant Padawski and a handful from B Company entering the main door outside the bar. They were talking loudly and seemed to be a little the worse for drink. Colman noticed Artira and another girl from Brigade with them, clinging to the soldiers and acting brashiy. He shook his head despairingly, but it wasn't really his business. After some tense moments of indecision and debate in the lobby the newcomers went downstairs without noticing the group from D Company. Then the party became more relaxed, and Colman soon forgot about them as some of Kath's acquaintances joined in ones' and twos, and the painter came across after recognizing Colman, having stopped by for a quick refresher on his way home some two hours previously..Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Stern. "Fm not sure what Fm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. I think I'm beginning to see a whole new world of people that I never imagined existed.. "You think that's really a possibility?" Colman asked, looking concerned and doubtful at the same time..also left with a vague uneasiness. It hit theaters.Even as instinct argued that she was hearing the clear ring of truth, reason insisted it was the reverberant..There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Stern now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Stern chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion..A little moonlight nevertheless would be welcome. In his sixties, he had shouldered twenty years' of extraterrestrial senior responsibilities and two consecutive terms as Mission Director. Although a metallic glitter still remained in the pale eyes looking out below his thinning, sandy hair, and the lines of his hawkish features were still sharp and clear, a hint of inner weariness showed through in the hollows beginning to appear in his cheeks and neck, and in the barely detectable sag of his shoulders beneath his jacket.
