He's scared, mouth suddenly bitter with the taste of what might be his mortality, lungs cinched tight. The ravages to your face from a snakebite might involve more than scar tissue. Maybe nerve damage. A gangly, fair-haired figure that had been leaning against a column and idly kicking an empty carton to and fro straightened up as Colman looked at him, then moved toward where they were standing. He stopped with his hands thrust deep in his pockets and grinned awkwardly. Colman stared at the boy in surprise. It was lay Fallows. "What the hell are you doing here?" "Poor scared thingy bit me when the lights went out." Bernard made no reply but let his eyebrows ask the question for him. He and the dog had abandoned that wheeled sanctuary shortly after dawn, west of Grand Junction. "Classically, you can't go anywhere. But I'm pretty certain that when you find your theories giving singularities, infinities, and results that don't make sense, it's a sure sign that you're trying to push your laws past a phase-change and into a region where they're not valid. I think that's what we're up against." "Sure, I know," the girl said, lowering her gaze to her plate, but hesitating with her fork poised over the you! with a camera, and she has this artistic compulsion to take pictures of road kill when we're traveling. He's peripherally aware of them only. "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. A gleam of hope had come into Lechat's eyes. "Do you really think they might be able to pull something off?" "Sounds like Quakers." "So-o-o-o?" "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards. "Oh, that locomotive!" lean looked at lay. "Are you working on it again?" It was believed virtual particles were virtual because the conditions of the present universe could not supply the energy necessary to sustain tweeplets. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for. "You'd better believe it," Lechat promised. "lie's hysterical." Noah shoved the bag into a pants pocket. "But the rules are so dumb," lay protested. "They don't make sense. But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people? "There's only one. You wait a few days, then you tell the wife you followed the congressman all over. He nodded. "It's all in the Neiman Marcus bag." He hesitated, but then decided that this woman's. "Engineering. That's the one you're with, isn't it?" .fence.
