You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation--to bring the planned population up to something like twelve thousand. It has a chance to profit from what Earth has- learned, and to plant the seeds of a strong, unflinching and unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as opposed to pride. Weakness or strength. I offer the latter alternatives". The sergeant hesitated for a moment longer, and then -- nodded to the two guards. She didn't believe in miracles, neither the when he worked at the university, but I can't rely on him to educate me now, because it's impossible to. Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible permutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colors as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UUE; UEU, depending on the color charges assigned to the three constituent quarks.. Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code.. Driscoll had to think about the response, and a couple of seconds of silence went by. "It's not the same," he said.. "Your comparison is quite invalid," a girl who was with the boy pointed out. "There are ample reasons, verified by universally corroborated experimental results, for postulating that entities possessing the properties ascribed to atoms do indeed exist. Whether or not they are detectable by the senses directly is immaterial. Where are your comparable data?" "That's exactly what they are," Pernak said. "In the material sense, anyway. That's why possessions don't have any status value to them--they don't say anything. That's why you won't find any absolute leaders down there either." "How come?" Lechat asked, puzzled.. "Not in this case," said Geneva. "I saved him." "You did? How?" "We lived in San Francisco then." "He did. She's got a place in the city--just across from the base.".. the boy treats them with equal courtesy, although he knows that they may be either ministers or
