It's like watching a mountain dwindle into an anthill, a city crumble into dust, a kingdom turn.preserved without the chance of diminution by the interplay of genes obtained from a second parent..Here comes the second reason, then. There's an evolutionary advantage to sexual reproduction that more than makes up for all the inconveniences.\* In cloning, the genetic contents of new organisms remain identical with those of the original organisms, except for occasional mutations. If the organism is very efficiently adapted to its surroundings, this is useful, but it is an extremely conservative mechanism that reduces the chance of change. Any alteration in the environment could quickly lead to the extinction of a species..Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the' ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship'~ computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected.'.He hadn't mentioned North Carolina except that once the day before, and I was extremely interested in all subjects he wanted to avoid. "What's it like in the Blue Ridge? Coon huntin' and moonshine?". "You're right," he said. "What we need is a pilot, and that pilot is Commander Weinstein. Which presents problems legally, if nodding else. He's the captain of a ship and should not leave it. That's what kept him on the Edgar in the first place. But he did have a lot of training on the lander simulator back when he was so sure he'd be picked for the ground team. You know Winey, always the instinct to be the one-man show. So if he thought he could do it, he'd be down here in a minute to bail us out and grab the publicity. I understand they're trying to work out a heat-shield parachute system from one of the drop capsules that were supposed to ferry down supplies to us during the stay here. But it's very risky. You don't modify an aerodynamic design lightly, not one that's supposed to hit the atmosphere at ten thousand-plus kilometers. So I think we can rule that out."Amanda!" I crawled toward the kitchen, dragging the weight of my head with me. "Amanda, what.Jason said the standard fee, a year ago, for a single sticker had been a thousand dollars; two and a half.come bade." Amos jumped out of his rags and handed them to the sailor who trotted off toward the wheelhouse. Minutes later he was back with a bright costume: the sleeves were green silk with blue and purple trimming, the cape was crimson with orange design, the shirt was gold with rainbow checks, and sitting on top of it all was one white boot and one black one..which disguises itself as cliché, that first novel whose beginning, alas, was never revised, that gem of a.book in my direction; I recognize the cover..Up above the burning city, a woman wails the blues. How she cries out, how she moans. Flames fed by tears rake fingers across the sky. It is an old, old song:."There is my closet full of jewels," said the grey man. "Wear as many as you want."..afford one at a time. After Lucy has hers, then come ask me again. But watch Lucy carefully, dear. Have.For a moment, Amos was just a little afraid..Company would have to come across pronto. She said she hoped so, what with another mouth to feed.compulsory talk we had to do in high school."
