He hasn't given a thought to naming his four-legged companion,.So how did people like Howard Kalens feel about Chiron? Colman wondered. Did they think they could possess a whole planet? Was that why they erased kids minds and turned them into Stromboli puppets who'd think what they were told to, and into civilians who would say it was okay? But why did the people let them do it? Most people didn't want to own a planet; they just wanted to be left alone to be engineers or run their farms. A meticulously detailed tattoo of a rattlesnake twined around the pacifist's right followed seemed to be charged with some supernatural energy, as the aura of an elemental spirit might. With all public bars having been put off-limits to the Mayflower IIs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Rameley had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..to knock this killer off his feet. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Veronica, a practicing architect, was there with Casey, Adam, and Barbara. Celia had declined to return to the ship but was watching from the home that she shared with Lechat - on the coast; and Wellesley had taken a trip from his farm in Occidena to see his old ship recommissioned and renamed.. "Yes," 'Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. So I thought I'd come back down and hang around."Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Stern won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?".The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..He has no choice but to forge on..Curtis shudders. It's Goldilocks from D Company--they're the shitheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away..He retrieved the invoice from the Neiman Marcus tote, and with it the airsickness bag still packed full of
