She extended her hand, GENERAL J STORMBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected-as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter. condescension. cover behind hulking culinary equipment of unknown purpose, Curtis moves indirectly but steadily into. Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Sterm has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix." "Classified information," Colman murmured. Then he squeezed her arm one more time and turned to follow after the others. Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole to cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans. So much to lose. "How long ago?" "I know you didn't, Aunt Gen. I know." The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence. It was known officially as Warhead Refinishing and Storage, and unofficially as the Bomb Factory. Nobody worked there. Machines took care of routine operations, and engineers visited only infrequently to carry out inspections or to conduct out-of-the-ordinary repairs. Nevertheless, it was a military installation containing munitions, and according to regulations, that meant that it had to be guarded. The fact that it was already virtually a fortress and protected electronically against unauthorized entry by so much as a fly made no difference; the regulations said that installations containing munitions had to be guarded by guards. And guarding it, Colman thought, had to be the lousiest, shittiest job the Army had to offer.. "I never found out who he was. For all I know, nobody else did either."..
