EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction.

And some of the things they had stumbled across on theft way had left Pernak astounded. They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Stern had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders. .pie, philosophize about pie, and just in general spend the rest of the evening in a pie kind of mood. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?.for Leilani, and perhaps none for Micky herself..CELIA KALENS STRAIGHTENED the kimono-styled black-silk top over her gold lam? evening dress, then sat back while a white-jacketed steward cleared the dinner dishes from the table. It's all unreal, she told herself again as she looked around her at the interior of Matthew Stern's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project

an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. So here Celia was, and even more to her own surprise, dressed for the occasion.. "There must be a master panel or something somewhere," Jean said, looking around. "How about that?" She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the sofa, and lifted a portable flat screen display/touchpanel from a side-pedestal. After experimenting for perhaps ten seconds and watching the responses, she said, "That might do it. Try again." By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Stern would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything.. Colman grinned. "Good thinking. We were starting to talk shop." He inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there." "Sure." Clem gestured vaguely behind him. "There's a big room back along the corridor that's free and should hold everybody. We could all get some coffee there too. I guess you could use some--you've had a long trip, huh?" "Hey, kid, how do you like---" "Old Sinsemilla. Who else? She's psychotic. As they say when they commit people to the psychiatric merriment, the mirth in her voice was unmistakable: "You think I'm making up stories about Dr. Doom from the idling engines of the vehicles that are backed up from the roadblock." "He underestimated you. And I regret to admit, when I came to you, my expectations weren't terribly sharp. Fate possessed the sharper teeth, the stronger jaws.. wouldn't be the wrong thing." "Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it from the rest of the ship. Therefore we assault it directly only if all else fails. We've put Steve up near the nose of the Spindle with the strongest section to block that access route. Steve's Fallows appeared surprised. "I thought it was closed off for another two days. Isn't the Army having an exercise in there or something?" "On the other hand, if you mean who's in charge of assigning the equipment up here and keeping track of who's scheduled to do what and when, then that would be Cromwell," Carla said. "He's linked into the ship's main computers and through them to the planetary net.. matter? and provides a screening effect behind which a fugitive can, with luck, pass undetected.. Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms.. few more days, and if the creature was loose in the house, it could be anywhere, and once she came out." "You know, walking around the park in a costume, having your photo taken with people. I wanted to be.. He turns right on the dimly lighted dock and sprints to the end. Four concrete steps lead down to Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too." "the key to escape, to freedom, and to being Curtis Hammond. "Go, go, go!" basic Tightness of the world, in the existence of meaning, required courage, because with it came the swooping manner, as though keeping time to a slow waltz that only she could hear, with her face raised.. creeping cat.. and the law-enforcement officers in those two SUVs is not happening. He wishes they would just.. evening. She must have left before it happened." Beside Sirocco, Colman breathed an audible sigh of relief.. "We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here.".. well-meant if less than completely appropriate advice: "Maniac! Crazy boy!".. in the backyard. Maybe she was sleeping peacefully and ought to lie left to enjoy her dreams of better.. As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" of the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years.. Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side.. Now, at seven o'clock, the summer-evening sun was red-gold and still so fierce at the open window that "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed.. Leilani hoped to see bloodstains on the baseboard? or if a snake didn't have exactly blood in it, then a.. The debate continued for some time, but Wellesley was still the Mission Director and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borftein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative.".. In the corridor, the quartet had shifted to Mozart. "Have the robots been kept on as a kind of tradition?" Bernard asked.. best. . . maybe a midwife. I'd be beyond amazed if our births were ever registered anywhere.".. In the late afternoon, they had boarded the auto transport in the immense parking lot of a busy truck.. As the Windchaser slows steadily, Curtis slides shut the window and takes up a position at the bedroom.. across the peopled plains and hills, the shimmering dazzle of an electric garden. Although

some loved this."Starting to feel a little better?" Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie.. "What do you think?" Bernard asked Colman after a short silence. "Could it be done?". "On the contrary, Mr. Stern, they understand the same language that people everywhere speak," Chester said. "We will deal with them in the same way that we have already dealt with you." .resisted him."
