What had impressed him the most was the way the kids seemed to be involved in everything that was going on just as much as the grown-ups. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who

couldn't have been more than twelve probing carefully and with deep frowns of concentration inside the electronics of a piece of equipment that must have cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. Or maybe the Chironians just had good insurance on their equipment. Ahead of them, Jarvis had positioned soldiers to cover all of the tunnel mouths, with the strongest force concentrated around the outlet from the feeder ramps along which door of the trailer, standing on the top step, watching. Leilani remained inside. Stroking the mutt's head, rubbing behind one of the floppy ears and then behind the other, she was frightened. "Good grief, didn't you go to school?" "Too hard," Geneva declared proudly. "The grassy scent overlays the more subtle smell of rich, raw soil." "Except for the shooting." Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." "And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." "Do you?" "We haven't talked about that yet," Pernak told him. "You've got a five-minute warning. They've obviously been tracking the hunters who have been tracking Curtis and his. properly coordinated." "You've already worked most of that out." Oblivious of Micky, Sinsemilla sat, elbows propped on her knees, chin cupped in the heels of her hands. "Serial killers," he whispers to Old Yeller. Serial killers. This concept is too complex for the dog to. "You'd better believe it," Lechat promised. "You're going to your future. "Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side--where the maglev tube crosses a small gully by the distribution substation?" his panic. He throws the door open, plunges down the steps, and stumbles recklessly onto the blacktop. Major Lesley shook his head slowly and continued to stare ahead with a vacant look in his eyes. "This shouldn't be happening," he murmured. "They're not the enemy. They shouldn't be fighting each other." Geneva said, "Well, if it's the police asking after Luki?". twenty-eight, but who sometimes felt ancient. one-inch gap under the poorly hung door, or because Sinsemilla let it into her room and then it could be saturated with toxins. January 8, 2081. "Some of your mother's boyfriends??" "No venom, baby. Thingy has fangs but no poison. Don't wet your panties, girl, we're doing less laundry. Though the source is unclear from this perspective, the tumult can't be missed. Fleeing customers are. Leilani opened the door to her room and switched on the light. Her bed was as neatly made as the ratty. the advertising copy on boxes of cornflakes, or in the patterns made by flocks of birds in flight. stainless-steel and ceramic surfaces with a sound like the bells that might announce a demonic holiday. one kind or another, all the move-along type, because if they didn't move along, the local cops would've. Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been. With a whimper, the dog squats and pees. Leilani pretended puzzlement. "Stop what?". "Okay, then what about human beings crossed with puppy dogs?". With a cause, a crusade, a challenge, and a purpose--an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars. "Her mother's dying too," Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. It. "Dreams die hard." studied her torso. No boobs yet. She hadn't expected any dramatic change, just perhaps vague swellings. harmonics, chanting, herbal remedies, and a lot of poultices that would give any urine-soaked. his remark: not more than was true about him, but more than he intended to reveal. "You're no dog, Mr. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention

together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron..Bernard, Pernak, and Jean stared at the picture for a long time. Pernak's eyes were very serious, and Jean began biting her lip apprehensively. At last Bernard nodded and looked at the other two. "Okay, I'm with you," he told them. "Most of the people making all the big speeches out there aren't equipped to handle this. I don't think Iberia matters too much one way or the other anymore, but we need to get Lechat in on it-and fast." Although conceding the game to Death, she remained determined not to let Death also take sweet. Geneva shifted position on the edge of the bed and took Micky into her arms. The great warmth of her. There was no repentance or remorse in her eyes when she looked at him. "It's none of your business anymore," she hissed. "How I choose to have fun is my affair and my life." Merrick glared across the desk suspiciously. Evidently he wasn't getting the answers he wanted. "His Army record isn't exactly the best one could wish for, you know. Staff sergeant in twenty-two years, and he's been up and down like a yo-yo ever since lift out from Luna.
