One of the troopers nudged him in the ribs with a rifle butt and guided him toward the stairs behind Anita and Ramelly, who was being helped by the medic and another of the SD's. Colman watched until they had all left, then returned to the others.."It certainly puts a new light on things," Lechat conceded. He sat back again, looked from one to the other, and spread his hands resignedly. "So am I to take it that I shouldn't assume your Support in the matter I talked about earlier?""Me?" Jay exclaimed. "That's my point-how do the Chironians satisfy them?..In the dark bedroom, Curtis almost shuts the door in shock. He realizes just in time that the one-inch gap.tensed, ready to follow his lead..The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeplets, the ratio depending on the temperature and shifting from one favoring tweeplets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeplets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated.."We can handle anything that comes," she told him..Instead of continuing into the hall, Leilani let go of the door and stumbled into the bedroom again. Stanislaw looked up triumphantly at Sirocco. "3.141592653,' he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in -the matter they already had?..Classified information," Colman murmured.
