"We're all having to lean how to do that." too hardened to be moved by the plight of anyone else. With grim determination, angry with herself for. "Engineering. That's the one you're with, isn't it?". Stern brought his fingers together in front of his face—a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed fiat and forward concealed an underlying harshness of line from all but the most discerning—and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the

manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." "Veronica made it!" Jean exclaimed delightedly. "Steve, I don't know how you handled it all." "Don't you ever give these guys a break?" Terry asked Sirocco. "I'm not sure... maybe fifty. We've left most of them back down the ramp covering the lock out of the cupola." THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area..house of the congressman's lover..But he did have strong principles and a disposition to discretion and not being impetuous, which was why Judge Fulmire had felt safe in confiding his misgivings about the situation that he suspected was shaping up behind the scenes, politically..astute..In its natural condition a society was like an iceberg, eight\*ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much- of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn. "Sure... thanks." They began walking toward the door..arrive. There's no mistaking their entrance for anything else. With the arrogance and the blood hunger of.Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia.."recognized too well..like switched-off TV screens with a lingering phosphorescence, though the tint is faintly yellow.."I'll have to keep that option open until we see how things shape up." Colman said. "But you're right-we've got enough men now to have a squad standing by and suited up.." "You'd be welcome to come too if you want," Rastus said.. "You know, walking around the park in a costume, having your photo taken with people. I wanted to be.Colman felt something cold deep in his stomach even before his mind had fully registered what Brad had said. "Sterm?" he repeated numbly. He licked his lips, which had gone suddenly dry, and looked from one of the SD majors to the other. "You mean he's already in there?"..icals are among its major products, as well as electricity." "Who operates it?" Marcia Quarrey asked..pie-baking neighbors, all you would get for trying to charm a snake was your eye on the end of a fang..Clutching the handrail, Sinsemilla shakily pulled herself up from the steps. She went inside, into the clock.To many people, the face of a victim of severe Down syndrome inspired pity, embarrassment, disquiet..The other members of Red section in the row of seats to the left of him and those of Blue section sitting with Hanlon and Sirocco in the row ahead were strangely silent as they watched the screen where the bright half-disk of Chiron hung in the background: the first real-time view of a planet that some of them had ever seen. Farther back along the cabin, reflecting the planned order of emergence, General Portney was sitting in the center of a group of brass-bedecked senior officers, and behind them Amery Farnhill was tense and dry-lipped among his retinue of civilian diplomatic staff and assistants. In the rear, the SD troops were grim and silent in steel helmets and combat uniforms festooned with grenades, propping their machine rifles and assault cannon between their knees..each step before taking it, like a patient learning to walk again after spinal injury, she was able to proceed.you are." "Not me, not bat-blind Geneva.."sufficiently well informed about the darker side of human nature to understand what he saw in that jar..Bernard sat back and drew a long breath. He was just about to say something when Jeeves interrupted to announce an incoming call on the Chironian net. It was Kath, calling from her place in Franklin. "I've heard from Casey," she said when Bernard accepted. "He's collected his package with Adam, and they're on their way home with it. I just thought you'd like to know.." "If you wish. Sir when you talk to me." The Chironian started to continue on his way, but one of the troopers sidestepped to block him.."How long ago?"..Colman was about to make a joke Out of it when he realized they were serious. He knotted his brows and directed an inquiring look at each of them in turn..Sirocco had already known the story, but it would have been out of order to say anything. Stanislau's transfer to D Company had followed an investigation o~ the mysterious disappearance from Brigade stores of tools ~and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping mart-."One week, and already you're a master of hugely befuddling conversation. Oh, I'd love to hear what a.what the coroner will certify as the cause of his death..Adam seemed to think about it for a long time. "No ...' he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling.." "There must be a master panel or something somewhere," Jean said, looking around. "How about that?" She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the sofa, end lifted a portable flat screen display/touchpanel from a side-pedestal. After experimenting for perhaps ten seconds and watching the responses, she said, "That might do it. Try again.."..Curtis doesn't want a refuge. He wants to find an escape hatch. And quickly..Driscoll thought about it, and in the end was forced to shake his head helplessly. "Not a lot that you'd be interested in, I guess," he confessed.."I'm not in fourth grade," Leilani said, pouring the warm beer into the sink. "We're twenty-first-century." "Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?". "Who are they?" Jay asked as he sensed Colman's tensing up.
