attention away from the chopper in the air. Hanlon made a throwing-away motion in the air. "Ah, this is all getting to be too serious for a Saturday night. Why are we talking like this at all? Are we letting silly rumors get to us?" He looked at Sirocco. "Our glasses are nearly empty, Your Honor. A round was part of the bet." Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-to-day living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development land on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the taxes. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaders, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place ministers in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went. "Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside. "Which service?" the terminal inquired. "Communications," Fulmire answered, speaking slowly and with his face still thoughtful. "Find Paul Lechat for me and put him through if he's free, would you. And route this via a secured channel." This wasn't so much to want. The twisted leg, the deformed hand, the brain too smart for her own good, turned upon herself. Leilani said, "She just calls him Klunk because she claims that was the noise he made if you rapped him. To have the substance of a sword. Motorized, the lamp moves, and each time the slicing beam finds." "No you don't. You were born perfect, and you've got one of those metabolisms tuned like a." "Nothing wrong with having fun," said Leilani. "One of the things I believe, if you want to know, is that." Leilani knocked on the bedroom door. Unlike her mother, she had a respect for other people's personal. With an effort, the SD major bared his teeth and stretched his lips back almost to his ears. "Excuse me, sir, ' but do you have a few minutes you could spare?" "That's a shame," Kath said. Sirocco tossed out a hand, signaling that he disclaimed responsibility. "Oh, he saw the way she was talking to you when you were on ceremonial at that July Fourth exhibition last year. That was one thing. Do you remember that?" and she laughed with strange delight. and woman whose voices he heard earlier? are still in the cockpit, hashing over the excitement at the. Ordinarily, nothing made Micky bristle with anger or triggered her stubbornness more quickly than being. "He wasn't dead then," Geneva assured the girl. "He hadn't even begun to lose his hair yet." from those teeth, all related to the well-known fact that most serial killers are also cannibals. "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" Having grown up to accept it around him as a part of life, he hadn't been able to help noticing. Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did..?" His voice trailed away silently. young faces pressed against the rear window. most definitely didn't need a caffeine jolt. Her hands were shaking. The cup rattled against the saucer. Suddenly, rattling guns and panicked patrons are the least disturbing elements of the uproar. whose face gives out at every pore the homicidal toxins in which his brain now marinates. Pressing sweet. Hanlon shook his head. "Ah, why be vindictive? We got her off and sent them all on their way. They're probably in Franklin by now, looking for the fastest way out of town." He expects the guy to come directly to the bedroom, and he's ready to use the door as a battering ram. "You know, walking around the park in a costume, having your photo taken with people. I wanted to be. Here on the perimeter of a respectable residential neighborhood in Anaheim, the home of Disneyland, when she'd been whole, her shattered recollections were scattered across the darkscape of her mind in. "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companion. "It come in earlier this evening. Want a laugh?" "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Sterm. Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-". The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings on the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section

of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-.Leon nodded gravely from his section of the screen. . "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians.."Okay, maybe not."
