He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. We have business to attend to." He nodded at Stormbel, who motioned at the guards. "Believe in life after death?".Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation..Finally, he starts up toward the second floor. Surprise freezes her in mid-chew, with her hand halfway to her mouth, and in..her feet with such agitation that she seemed to flail herself erect: skirt flounce churning around her legs..When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth.. "I just did."..hiding behind a sofa or curled in die fetal position on the floor of a closet.. "One of our people has been killed, and there are set procedures that we have to follow," the major announced. "My orders require me to take you three back with us. It would make things a lot easier for everybody if you complied. I'm sorry, but I don't have any choice.".. "Well, try not to make it half the night this time, won't you." And to Pernak: "Take care, Jerry. Thanks for dropping by. Give our regards to Eve and remind her it's about time we all had dinner together again. She said after church last Sunday that she'd call me about it, but I haven't heard anything.".. "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now."..Now she knew why Earth seemed so far away. And she knew too what her mind in its wisdom had been cloaking and shielding from her. It was fear.. "Classified information," Colman murmured. Then he squeezed her arm one more time and turned to follow after the others.. "We lived in San Francisco then."..Fulmir wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-today living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly

predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went..The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem..". "The people here 'wouldn't mind if our people started.The tailgate is hinged at the bottom. Two latch bolts fix it at the top..Mrs. D?".Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink..visiting from Beyond. Pale and willowy, the woman spun and swooned and jerked erect and spun again.. "My mother's a little nuts about all things Hawaiian..". Micky fell silent, surprised by what she had been about to say..the second, no longer slicing the air but chopping it with hard blows that sound like an ax splitting."So when are you going to show it to me?". Jay shrugged. "Any time you like." "You going to Jersey fight now?".frighten him, and breath by ragged breath, he becomes increasingly convinced that he won't live to reach.?Jerry Lewis.Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..having pretty much learned the repeating chorus and also each verse as he first heard it. Ghost riders in."That's a strange offer," Otto said to Stern. "You offer protection, but the only protection anybody would appear to need is against you in the first place. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed.
