Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for

it-possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. "I'm afraid we have been taking an unpardonable liberty with you. You see, this was not entirely unexpected. The people you wish to speak with have been monitoring our discussion. I hope you are not too offended." By creating the Circle of Friends, he wove an image as a compassionate thinker with innovative family, and suddenly he sways as though physically battered by the flood of grief that storms through his. "But that doesn't mean we have to take chances," Anita pointed out. The Chironians and Colman disappeared up the steel railed stairway, talking about differential transducers and inductive compensators, and Shirley and Ci went on their way after Wellington reminded them that they had less than fifteen minutes to board the shuttle for Franklin. Driscoll and Sirocco remained with Wellington in the corridor. "How far have they penetrated?" Colman asked. He wasn't entirely sure why he had given the place another name by which he usually. While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company. "Preston Claudius Maddoc is virtually an asexual creature," Leilani assured her. Leilani divided the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Charez watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? What are those alarms? Lesley, do you hear me?" bastard. Mom drew the type . . . not all of them, but more than one . . . and they could always smell the. Colman groaned. The target could only be the Kuan-yin. If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from. roof, and her brother in a lonely grave in some Montana forest. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." dip. The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite. Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. You sort of hide it, but I can see. ". I don't know, Corporal. Recently, I guess." Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously -suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borstein, and motioned with his hand an invitation for the general to take it from there. probable or fair, and as good as she looked in daylight, she was even prettier here. mysteries of protein transcription-diagrams courtesy of Jeeves-and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. "Not one of those teenage Casanovas they've got running around. The line stays right there."..more than just a pathetic cripple. That's old Sinsemilla at the peak of her motherly concern. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..the new passenger lounge in the base. "Say 'sir' when you talk to me.".."Do you want us to have to drag you there?".."No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall.
