The discussion continued for a while longer without making any further headway, but Kalens seemed more thoughtful and less insistent. Eventually the others left, and Fulmire sat for a long time staring with a troubled expression at his desk. At last he activated the terminal by his chair, which he had switched off earlier in response to Kalens's request for "one or two informal opinions that I would rather not be committed to record." But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up.. "They destroyed all the pictures of him. Because when he comes back with the aliens, he'll be completely." Little snort, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands.. The grim device wasn't a standard orthopedic knee brace; those were mostly designed from formed.. Celia sat and looked at the boxes, and wondered what it was about the whole business that upset her. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her

oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over?..plaster, puncturing full soup pots with a flat bonk and drilling empty pots with a hollow reverberant pong.. "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again."..Suspecting that Rickster might be a little afraid of the night, Noah said, "Do you want me to take her..at me. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..out of sassy altogether, leaving them feeling more pity than delight..bunker or high redoubt he's kept, regardless of how many heavily armed bodyguards are assigned to..true enough, honey. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Stern raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. "You can't fool me, Steve. You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation--to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing..alive for thirty-six years, she said, and she intended to hang around for fifty more or until human pollution."Yes."..
