In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness.
